Skills

Javascript | React | Redux | Node | SQL | Sass | HTML | CSS

Projects

Settle · React | Node | Express | Axios | Socket.io | Nodemailer | Twilio | Firebase storage | Sass

- A tool to help groups make decisions
- Awarded most technical in my cohort
- Learned & implemented socket.io to enable realtime updates for suggestions and participants
- Used Firebase storage to enable users to upload images
- Live site: settleit.app | Code: github.com/ewillroth/settle

Ordeer · React | Node | Axios | Firebase database | Material-UI | Nodemailer | Jest

- An online ordering platform for restaurants
- Group project built in 3 weeks with two other students
- Contains only functional components to utilize React Hooks
- Learned & implemented Material-UI to create display cards for each menu item
- I focused on front-end code including the registration page, order page and Jest testing
- Code: github.com/restaurant-ordering/ordeer

NoDBdungeon · React | Node | Express | Axios

- A front-end focused dungeon crawl game using data from the Dungeons & Dragons 5e API
- Code: github.com/ewillroth/nodbdungeon

Experience

Waymo, via Adecco · Fleet Systems Operator
Austin, TX (February 2016 – February 2018)

- Safely operated self-driving cars on public roads
- Provided detailed feedback to developers to improve performance of self-driving car software
- Assessed and analyzed real world and simulated situations to support vehicle operations

Home Depot · Measure Technician
Austin, TX (June 2014 – February 2016), Houston, TX (April 2018 – November 2018)

- Measured customers homes quickly and accurately using specialized drafting software

Education

DevMountain · Web Development Immersive Course
Dallas, TX (November 2018 - March 2019)

Texas A&M University · Bachelor of Science in Economics, Minor in Business Administration
College Station, TX (August 2008 - May 2012)
